2. We need to develop a detailed listing of technologies and products targeted or obtained by the Soviets and then to translate them in these two contexts:

- a. Indicated additions to COCOM list.

- b. Information to be communicated through contracting office and otherwise to companies targeted or engaged in technology.

3. I am meeting with Frank Carlucci this morning to brief on material and discuss the modus operandi for handling. John McMahon will follow through.

4. What relationship or what use do you see that can be made of new information in light of our new intelligence priorities for the 80s as set out in the attached report?

5. I am impressed by the attached itemization of DIA efforts to curb technology outflow. At the same time it indicates how much there is to do with new material. This should be reflected in the CI testimony at the Chafee hearings.
